# Communities Represented

I was coming a country that is outside of the US. San Diego has been a big part in me as well as supporting me to be better at my own shell. I used to live in the neighborhood whereas everyone tries to stay away; I learned from many different perspectives and used my best judgement to turn what people avoid into my lessons. I am thankful for the fact I got to live in that neighborhood.

I have been a PTK member since my second semester at college. I got involved in to doing more things and helping others. I also had done volunteering services while I was in high school for park and beach clean ups. When you do good things for the people around, you start feeling good and that was the reason I continued doing so.
